Programs/Courses Offered

Diploma/Certificate Programs:

1. FULL RESIDENTIAL INSPECTION COURSE

96.5 Hours

Occupational Objective:

This 96.5 hour Full Residential Inspection training program teaches the student how to inspect a home in compliance with the State of Arizona Board of Technical Registration, and numerous nationally recognized home inspection associations' Standards of Practices.

ITA provides a "Hands on" experience, the student will conduct a real home inspection, will learn report writing techniques and learn how to set up and run a successful Home Inspection business. The student will also conduct his/her first parallel inspection the last day of class. That leaves ONLY 29 more parallels for certification! There is no prior experience required in the building industry to become a home inspector.

The Home Inspection profession has not been adversely affected by the housing crisis. In fact, due to the number of foreclosures and short sales, the number of home inspections has increased the past couple of years. Housing foreclosures in Arizona are projected to stay at their current levels for another four years making this profession a very favorable one.

Inspection Training of Arizona will prepare the student in two ways to proceed in this profession, successfully operate their own business (self employed) or to join an established inspection company.

After registering for class, the student will receive our classroom text book, Principles of Home Inspection: Systems and Standards, Second Edition, Carson Dunlop & Associates and Code Check Complete, by Taunton Press Inc. The student is encouraged to read this book prior to class.

The Home Inspection business is an emerging field with limitless potential. Salaries are based on work ethic. The Home Inspector could expect their starting income to be around \$24,000 per year, if starting their own business, while established home inspectors could expect to make around \$100,000 per year.

This course satisfy the required educational requirements set by the Arizona State Board of Technical Registration, R4-30-247 A.5.
